

AI COPILOT & AUTOMATION • ENTERPRISE

Your Team, Amplified by AI

From plain-language requests to automatic matching, escalation, and insights—SRH's AI does the busywork so your team handles more without adding headcount.

Whether it's an IEP meeting, a patient consultation, a court proceeding, or a government service, SRH helps your team communicate without delay.

TRUSTED BY ✓ Schools ✓ Government ✓ Healthcare ✓ Courts ✓ Enterprises

THE CHALLENGE

Coordinating language services is a lot of manual work—typing up requests, chasing the right interpreter, watching for the ones that stall, and digging answers out of the data. It doesn't scale, and things slip.

THE SOLUTION

SRH weaves AI through the workflow. Describe a need in plain language and it becomes a structured request; the right interpreter is matched automatically; stalled requests escalate on their own; and a copilot answers questions from your live data.

WHERE AI DOES THE WORK

1

Just Say It

Type or speak a request in plain language—AI structures it instantly.

2

Auto-Match & Escalate

The right interpreter is found automatically; stalled requests escalate on their own.

3

Ask Anything

A copilot answers from your live data—no report-building required.

YOU SAY

Request "Spanish VRI, tomorrow 2pm"
For Lincoln Elementary
Then Leave it to SRH

AI HANDLES

- ✓ Structured Request Created
- ✓ Best Interpreter Matched
- ✓ Auto-Escalates if It Stalls
- ✓ Answers From Your Data

WHY ORGANIZATIONS CHOOSE SRH

- ✓ **Plain-language intake**
Type or speak—AI turns it into a complete, structured request.
- ✓ **Nothing falls through**
Stalled requests escalate on their own, before they become a problem.
- ✓ **Matching that runs itself**
The right interpreter is found and dispatched automatically.
- ✓ **Answers on demand**
A copilot pulls insights from live data—no manual reporting.
